

Eagle Creek and vicinity - Forest Roads 77, 67, 70 and 7015

In June of 2010, a flood event occurred, which washed out several sections of the Eagle Creek Road, National Forest Service Road 77. As of December 3, 2010 Forest Road 7700 has been closed approximately 1.25 miles SE of Tamarack Campground to approximately 1.7 miles NW of its intersection of the 7745 (East Eagle Road).

Be advised that traffic in the Eagle Creek area and access roads into this area could be congested. Be aware that there may be delays, and sections of the road will be closed to the public while construction operations take place. Truck traffic may be encountered at both ends of the project.

Reconstruction/repair began during the summer months of 2012 and is expected to be completed by Fall.
